20 June 1966

MEMORANDUM FOR: Executive Officer
Deputy Director for Science and Technology

SUBJECT : Requested Press Releases

1. Attached is a letter from Fairchild Camera and Instrument Corporation requesting authority to release certain information regarding a 70mm Data Block Reader developed and built for NPIC. Also attached is a letter from TCO, NPIC recommending certain changes in the release and suggesting that the information could be released with these changes.

2. This contract for the 70mm Data Block Reader was written by Office of Logistics for NPIC and it is therefore their decision. I feel that with the inclusion of the changes outlined by TCO, NPIC that authority could safely be granted for the release. However, since it is an OL contract I would like to suggest that you may want to broker this with the Office of Logistics Security Staff.
